

# EASY AS PIE BUDGET

Directions: Decorate the pie and pie slices. The complete pie represents all the money available to spend each month. After cutting out the pie slices, have your child pick the number of pie slices that would represent how much of the pie would be spent on the following categories. They can pick as many or as few slices as they'd like. Label each pie slice with the category. Place the labeled slices on top of the complete pie to see how they budgeted their money.
